

## Checking the direction of motor

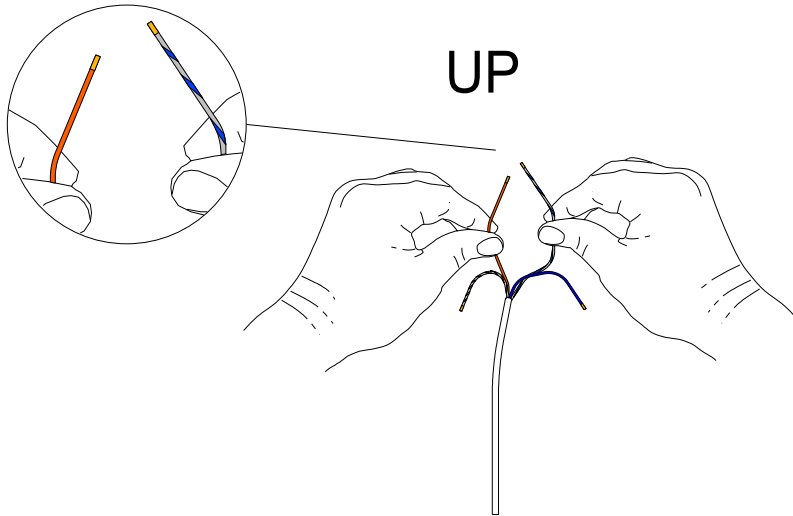

Connect the Orange and the Blue/White wires together, if the Art rises, go to "Adjusting end Limits",

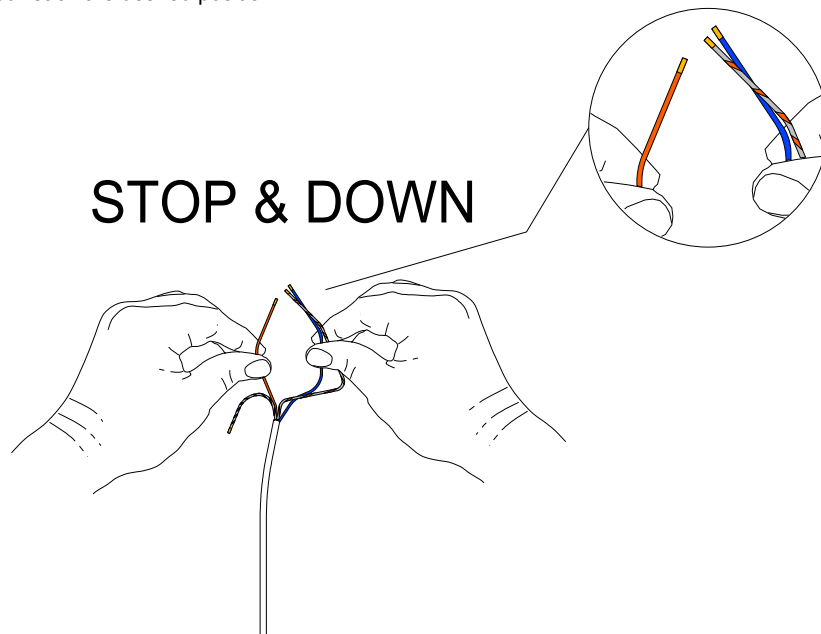

If the Art goes Down, connect and hold the Orange and Blue wires together until the Art jogs up and down. The direction is now reversed.

## Adjusting end limits

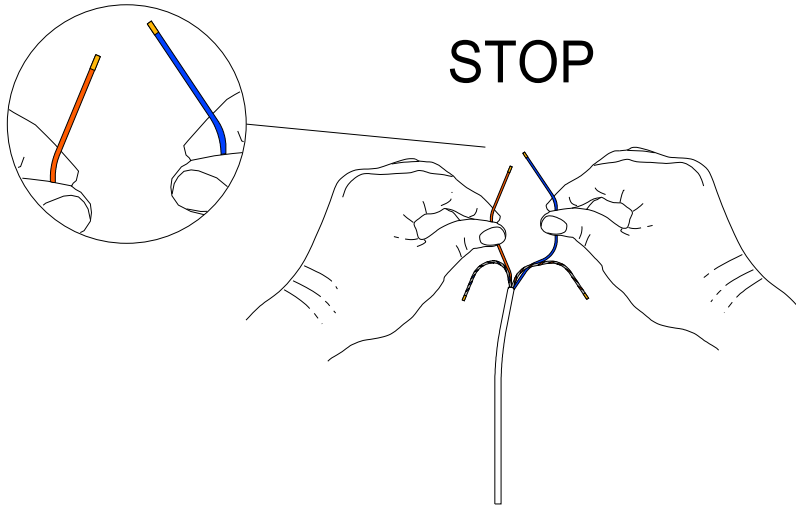

Connect the Orange and the Blue/White wires together until you reach the desired position.

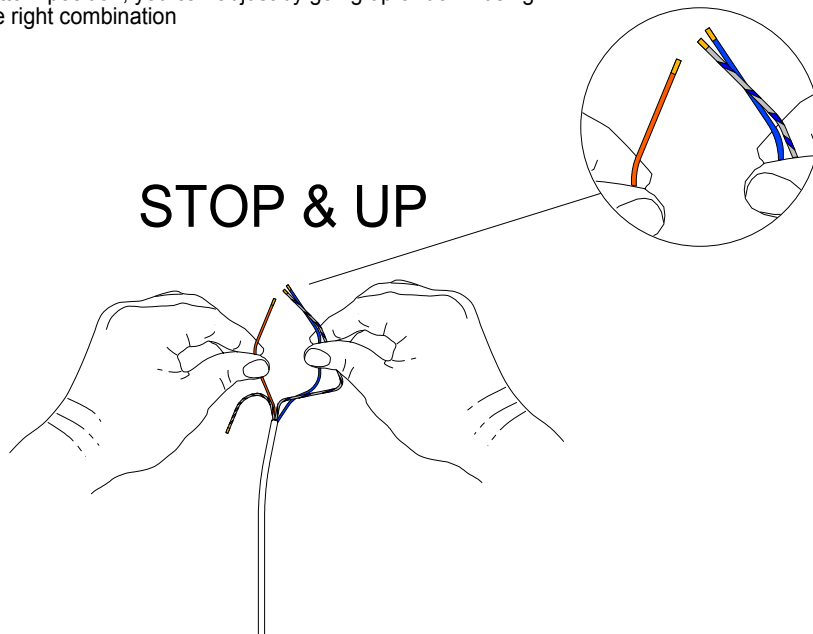

Connect the Orange, Orange/white and blue wires then release once the art starts to move down.

## Adjusting end limits

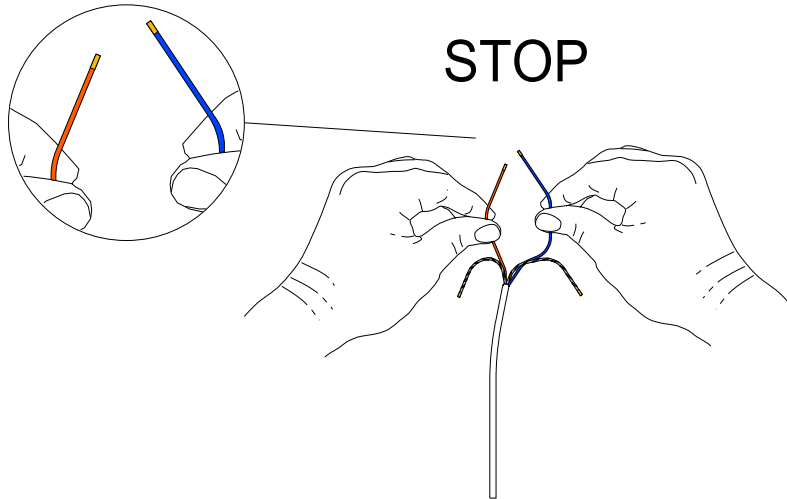

Connect the Orange and the Blue wires to stop the art at the bottom position, you can adjust by going up or down using the right combination

Connect the Orange, Blue/white and blue wires then release once the art will start to move up. the art will stop at its upper limit.

## Adjusting end limits

To confirm the end limits, hold the orange and blue wires until the art jogs, now the end limits are set.
